## Structural Engineering Technical Assistant

Alan Baxter Ltd is a leading firm of Designers and Engineers involved in urban design, new buildings and the conservation of historic buildings. The Firm's success comes from its breadth of knowledge, its imaginative ideas and ability to weave these strands together to create valuable holistic and sustainable solutions.

We are looking for a **Technical Assistant** to support our Structural and Civil Engineering teams on a wide range of projects. Duties will include producing scale hand drawn and CAD technical drawings from engineer sketches as well as a number of other supporting tasks, including technical admin input, with the longer term view of becoming a CAD Technician within the firm.

This role is ideal for someone with or studying for a HNC or HND with an engineering or architectural focus looking to develop their skills and experience. You should also have good IT skills with an interest in the urban built environment.

We are happy to consider employing someone attending college on a part-time basis.

Please send your CV and a covering letter to Andy Morton:
